

**CANADIAN ROCKIES
HOT SPRINGS**

**New at the
BANFF UPPER
HOT SPRINGS**

1930's look — 1990's feel

The natural mineral-rich water is still hot. The historic 1930's style of architecture remains. Everything else has changed. More than \$4 million in renovations at the Banff Upper Hot Springs brings visitors a whole new experience.

Facilities have been added or improved including:

- a new year-round outdoor mineral spring fed pool is 1.35 metres deep with benches all around
- an enlarged island includes a 25 cm deep children's wading area
- facility and pool access designed for everyone's needs

Canada's world-acclaimed national park system, began more than a hundred years ago with the discovery of hot springs on Sulphur Mountain.

- new modern change rooms with heated floors, 40% more lockers, change space, additional washrooms and shower stalls
- family/unit change rooms
- updated spa with aromatic steam; mineral plunge pool; aromatherapy wraps, massage studios
- spa products boutique
- gift shop, a 35-seat restaurant and a deck-side snack bar.
- reception area designed to accommodate tour groups
- interpretive exhibits indoors

The water - is always hot, on frosty winter days with snow swirling about as you soak or on cool summer evenings with star-studded skies. It's a rejuvenating, relaxing 40° C*.
